EDUCATION

National University of Singapore

Aug. 2023 – May. 2027

Bachelor of Science in Computer Science

Singapore

- Sophomore student with a keen interest in Cybersecurity and AI. Interested in building socially beneficial software.

EXPERIENCE

Mitsubishi UFJ Financial Group (MUFG)

June 2025 – Dec. 2025

Security Services Engineer Intern

Singapore

- Researched **OWASP Top 10** and **MITRE ATT&CK** frameworks to identify system vulnerabilities.
- Developed automation scripts using **Ansible**, **Python**, and **PowerShell** to streamline network operations.
- Built a centralized hub from scratch for monitoring and managing automation flows, improving visibility.
- Hardened systems by integrating security measures (credential management, audit logging) into pipelines.

Score Financial

May 2025 – Dec. 2025

Founding Backend Engineer

Singapore

- Built a secure authentication system using **Singpass (OAuth 2.0)** and ACRA APIs for user onboarding.
- Developed scalable backend services with **Node.js/TypeScript** using clean architecture principles.
- Managed **MongoDB** for data storage and **Redis** for caching; deployed via **Docker and AWS ECS**.

Jalan Journey

Oct. 2024 – Current

Chief Technology Officer

Singapore

- Led the development of a regionally-scaled edutech platform using **Next.js** and **Tailwind CSS**.
- Built an online store using **Stripe**, **Node.js**, and **Postgres** to list our games directly B2C.
- Managed infrastructure migration to **AWS** and designed a robust session distribution system.

PROJECTS

Humanite | Co-founder, AI/ML Engineer

Aug. 2025 – Dec. 2025

- Building AI interviewers for technical roles using voice agents, **Vapi APIs**, and custom tool calls.
- Managing both engineering and product management while sourcing for initial funding.

ProvCon | Undergraduate Researcher (Odyssey @ NUS)

May 2026 – Aug. 2026

- Working on systems to construct effective cyberattack provenance graphs for SOC operations.
- Reproducing documented cyberattacks to generate provenance graphs that provide comprehensive attack insights and improve threat detection.
- Researching frameworks to transform partial attack indicators into complete provenance graphs using PROVCON methodology.

Draco | NUS Hack and Roll 2025 Grand Prize Winner

Jan. 2024

- Created an IDE and transpiler for a traditional Chinese programming language, placing **Top 9 out of 150 teams**.

SKILLS

Languages: Python, Java, C#, Rust, TypeScript, SQL, Bash

Frameworks/Tools: Next.js, Node.js, FastAPI, React, Docker, Git, Linux, Ansible, Terraform

AI/ML & Security: PyTorch, TensorFlow, Groq, Knowledge Graphs, Burp Suite, Wireshark

Cloud/DB: AWS, Supabase, MongoDB, Postgres, Redis, Stripe
