EDUCATION

National University of Singapore

Aug. 2023 – May. 2027

Bachelor of Science in Computer Science

Singapore

- Sophomore student with a keen interest and focus in Cybersecurity and AI. I love building and safeguarding socially beneficial software.

EXPERIENCE

Rajah & Tann Singapore LLP

Aug. 2026 – Feb. 2027

CISO / Cybersecurity Engineer Intern

Singapore

- Managed security operations workflows using **Jira Service Management** for incident tracking and ticket resolution.
- Utilized **Axonius** and **CrowdStrike** for asset inventory and visibility across the firm's endpoint landscape.

Mitsubishi UFJ Financial Group (MUFG)

June 2025 – Dec. 2025

Security Services Engineer Intern

Singapore

- Researched **OWASP Top 10** and **MITRE ATT&CK** frameworks to identify system vulnerabilities.
- Developed automation scripts using **Ansible**, **Python**, and **PowerShell** to streamline network operations.
- Built a centralized hub from scratch for monitoring and managing automation flows, improving visibility.
- Hardened systems by integrating security measures (credential management, audit logging) into pipelines.

Jalan Journey

Oct. 2024 – Current

Chief Technology Officer

Singapore

- Architected **Greenhouse Games** (greenhousegames.io), a user-facing platform publishing educational children's web games, as independently deployable microservices sharing a **PostgreSQL** schema via **Prisma**.
- Built an automated game ingestion pipeline orchestrated with **Temporal.io** workflows, taking uploaded HTML5 bundles through validation, security scanning, compression, staging, and manual review before going live to 100+ users on launch day.
- Engineered a static-analysis security scanner that blocks games using unsafe APIs (eval, storage, cookies, external requests) and injects a strict **CSP** at deploy time to sandbox untrusted third-party code.
- Delivered four **Next.js** + **React 19** frontends (marketing landing, consumer storefront, developer portal, admin/reviewer dashboard) with **Chakra UI** and **NextAuth**-backed **Keycloak** SSO.
- Implemented storage and delivery on **AWS S3** with signed **CloudFront** CDN URLs, and asynchronous jobs via **BullMQ** and **Redis** across **Express 5** services.
- Containerized every service with **Docker** and shipped continuous deployments through **Dokploy** behind **Traefik** per-app domain routing.

PROJECTS

ProvCon | Undergraduate Researcher (Odyssey @ NUS)

May 2026 – Aug. 2026

- Reproduced the ShinyHunters Canvas LMS breach as a 10-phase automated attack simulation across 10 VMs using **CRADLE**, a declarative cyber range DSL.
- Mapped CTI narratives to **MITRE ATT&CK** techniques and validated detection coverage with **Wazuh SIEM** (93%, 13/14 custom rules triggered).
- Deployed production-grade Canvas LMS with **PostgreSQL**, **Redis**, and **OpenLDAP** in a segmented network; automated provisioning via **Ansible** and **Vagrant/libvirt**.

Draco | NUS Hack and Roll 2025 Grand Prize Winner

Jan. 2024

- Created an IDE and transpiler for an esoteric traditional Chinese programming language, **Top 9 out of 150 teams**. (qilstiano.github.io/draco)
